

**AMENDMENT TO THE SPECIFICATION**

IN THE SPECIFICATION:

**AMEND** lines 1-5 on page 1 as follows:

Title:

ELECTRIC HAND-HELD POWER TOOL

Cross-reference to related Applications:

This application claims priority under 35U.S.C. 119 (a)-(d) to German Patent Application DE 103 58 583.4, filed 12/15/2003.

Background of the invention:

Related Art

The present invention is directed to an electric hand-held power tool according to the definition of the species in Claim 1.

**AMEND** lines 25-27 on page 1 as follows:

Advantages of the Invention Brief Summary of the Invention:

The electric hand-held power tool with the features of Claim 1 has the advantage that, due to the fact that the dust-collection box is an integral component of the machine

**AMEND** lines 13-15 on page 2 as follows:

Drawing Brief Description of the Drawings:

The present invention is described in greater detail in the description below with reference to exemplary embodiments shown in the drawings.

**AMEND** lines 8-11 on page 5 as follows:

As a ~~deviation~~ deviation from the previous exemplary embodiments with an exhaust opening, a plurality of exhaust openings 17 in the form of holes can be provided in the wall of collection box 15.

**AMEND** lines 21-28 on page 5 as follows:

In the exemplary embodiment of the eccentric sander according to Figure 10, a hollow handle 20 for guiding eccentric sander is integrally moulded with machine housing 11 as dust-collection container 13. The handle housing is collection box 15, which can be closed – by cover 16 – ~~pn~~ on its open end facing away from machine housing 11. An air duct is formed in machine housing 11 that travels away from the fan and leads into the dust-ejection opening of ~~maching~~ machine housing 11. The dust-ejection opening is enclosed by collection box 15 that is handle 20. The dust filter is also located on cover 16 in this case.
